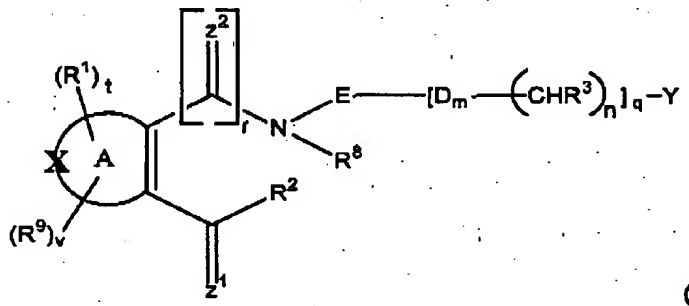
Abstract

The present invention relates to compounds of the general formula (I) and salts and physiologically functional derivatives thereof,



(I)

wherein

A is a non-aromatic ring system containing 4 to 8 carbon atoms, wherein the ring system comprises at least one double bond and wherein one or more of the carbon atoms in the ring can be replaced by a group X, wherein X is selected from the group consisting of S, O, N, NR^4, SO, CO or SO_2;

D is O, S, SO_2, NR^4 or CH_2;

Z^1 and Z^2 are independent from each other O, S, or NR^5 ;

R^2 is H, OR^6, or NHR^7;

E is an alkyl or cycloalkyl group or a monocyclic or polycyclic substituted or unsubstituted ring system which may contain one or more groups X and which contains at least one aromatic ring;

Y is hydrogen, halogen, haloalkyl, haloalkyloxy, alkyl, cycloalkyl, a monocyclic or polycyclic substituted or unsubstituted ring system

for the use as a medicament.
